TESTES DE USE INTERFACE (UI)

RELATORIO DE ACESSIBILIDADE

NINA CAVADAS DE OLIVEIRA RODRIGUES

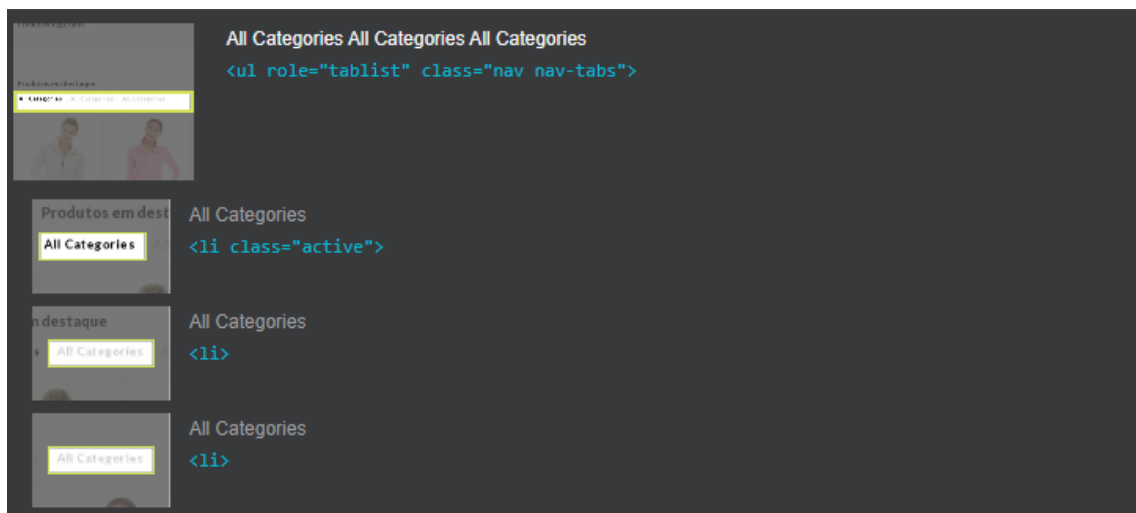

*Os testes de acessibilidade ajudam a identificar maneiras de tornar o seu aplicativo web mais acessível a todos os usuários.*

### **Nota de acessibilidade:**

### **ARIA:**

*Elements with an ARIA [role] that require children to contain a specific [role] are missing some or all of those required children.*

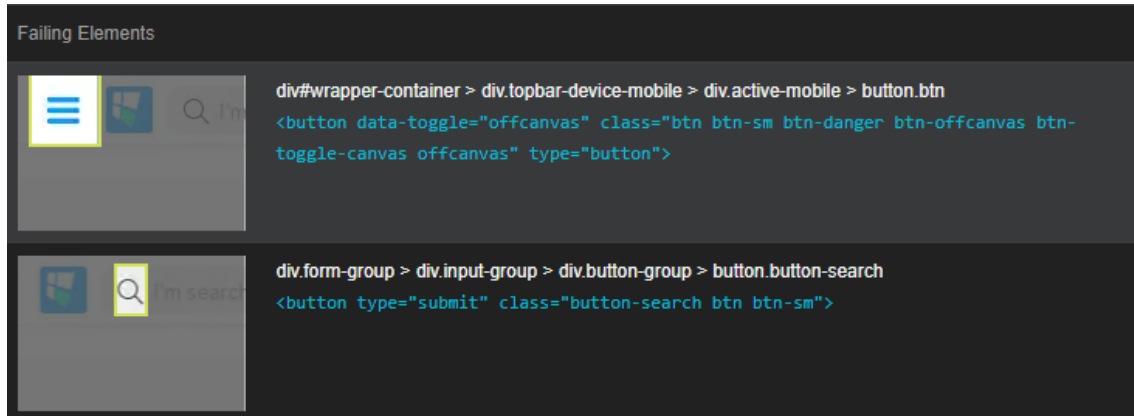

*Estas são oportunidades para melhorar o uso de ARIA em sua aplicação, o que pode melhorar a experiência dos usuários de tecnologia assistiva, como um leitor de tela.*

[Saiba mais.](#)

## Nomes e Labels:

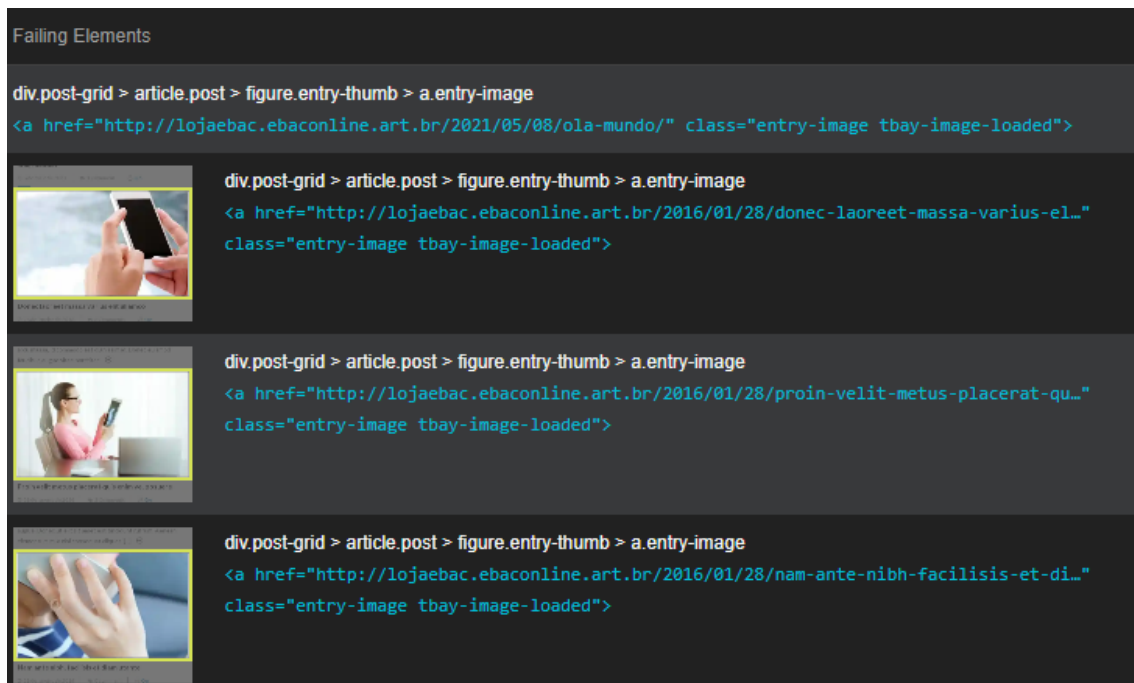

### Botões sem nome acessível

Quando um botão não possui um nome acessível, os leitores de tela o anunciam como "botão", tornando-o inutilizável para usuários que dependem de leitores de tela.

[Saiba mais.](#)

### Links não têm um nome discernível

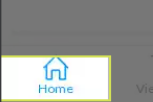

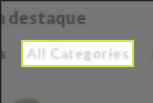

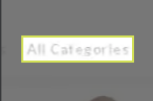

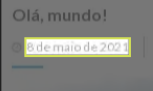

[Saiba mais.](#)

## Contraste:

As cores de fundo e de primeiro plano não possuem uma taxa de contraste suficiente
